- Users are expected to have a general familiarity with web browsers.
- **XGen Plus** will run only on Internet Explorer 5.5 and above.
- **XGen Plus** will utilize a back-end database for storage and retrieval of component information.

Web Interface (XGen Plus)

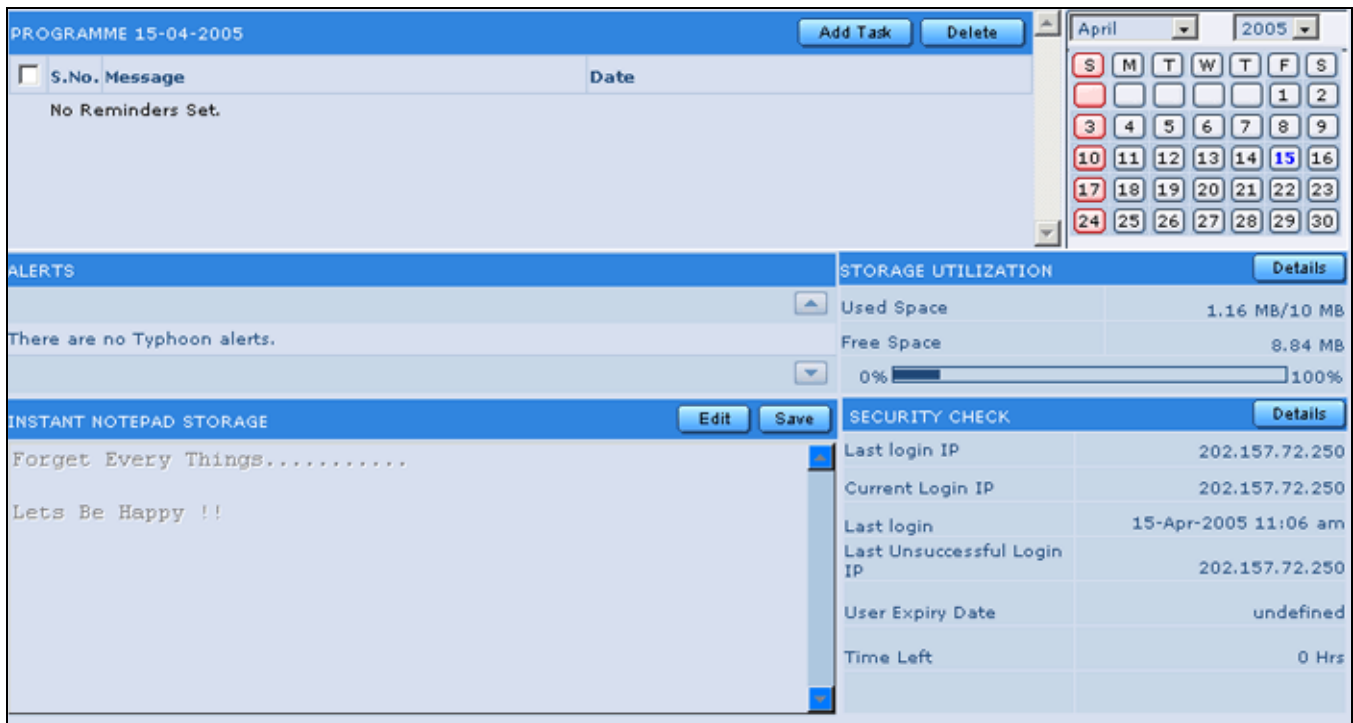

Fig 1.1 Home Section

1. **HOME:** Home page is the page where you start. We recommend that you spend moment on the home since it gives you vital information at a glance.
 - **Space Information:** Gives information of
 - Allotted Space Capacity
 - Space Utilized
 - Remaining Space including Trash
 - And a graphical display of space utilization in percentage
 - **Login Information:** Gives information of
 - Last log in IP
 - Last log in Date
 - Current IP Address
 - Last Unsuccessful Login IP and Last 10 login IP details.
 - **Reset:** It resets last unsuccessful Login IP and Last 10 login IP details.
 - **Instant Notepad Storage:** - The Instant Notepad Storage provided for users messages storage. it is a Simple Notepad for write user Messages.
2. **Scheduling Reminders:** The user can set reminders as Popup, SMS or Mail which will help in reminding some important tasks. The reminders can be sent on a particular date and time. If by chance there is any reminder which had been set as pop up but did not appear then there is a facility of missed pop ups which will show the list of those reminders which were not shown.
3. **Calendar:** A utility calendar is displayed which shows past and future dates. The current date is shown as bold format. When the user clicks on any date then all the reminders which have been scheduled for that particular date will be displayed. When the user clicks on any date and then on add task button, he can schedule the reminder for that date.

4. **System Messages:** The System Administrator can set any kind of messages or alerts if he wants to convey some message to all the users of a Domain or a particular user of the domain.
5. **Account Status:** Show status information of different folders.

Fig 1.2 Folders & Category Section

6. **Folders :** There are varied kind of folders, namely-

- Inbox
- Sent
- Drafts
- Trash
- Secure
- Storage
- Personal Folders: All personal folders created by the user. The user can enjoy the facility to create unlimited folders.

To enter use your security key number.

Login Name	gunjan.lokwani@soft.dil.in
Secure Key *	<input type="password"/>
<input type="button" value="Login"/>	

Fig 1.3 Secure Folders Section

- **Secure folder:** Secured folder is protected by additional password and is storing very sensitive correspondence. The user can store his confidential mails in this folder. The folder is accessed by a secure password.

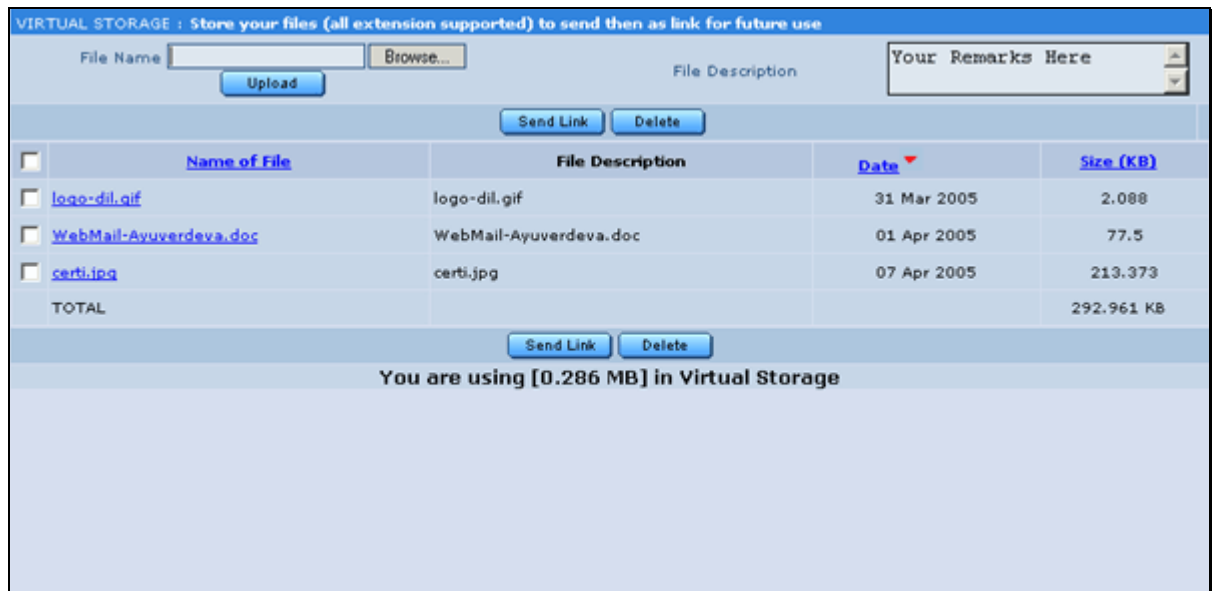

Fig 1.4 Virtual Storage Section

- **Virtual Storage *** : It stores bulky files, which could be difficult for the sender to transport by e-mail or for receiver to receive them in their limited storage in inbox and in this case the receiver will receive only the link of the file instead of the whole file and hence the inbox will not be overloaded. It can be used to gain access to the stored mails from any location for reference or use. The user can upload as many files as his mailbox size permits.

7. Category:

- All New mails
- Read mails: This will contain all the entries of mails which have been read, no matter in whichever folder they are.
- Today's mails
- Yesterday's mails
- Replied: It lists all those mails which have been received as a reply
- Forwarded: It lists all those mails which have been received as forwards
- High Priority It lists all those mails which have been received as high priority
- Attachment It lists all those mails which have been received with one or more attachments
- Scheduled: It lists all those mails which have been scheduled to be sent on later dates.
- Reply Awaited: It lists all those mails for which mails have been sent and the receiver has to reply back.

8. Search: Prevailing search option gives the power to amplify the search. The user can restricted his search according to date. Search map out message anywhere in folders.

One can:

- Look in All folders or specify any particular folder.
- Find messages even by writing the "contain" of-
 - From
 - Subject
 - Message
 - To
 - Anywhere

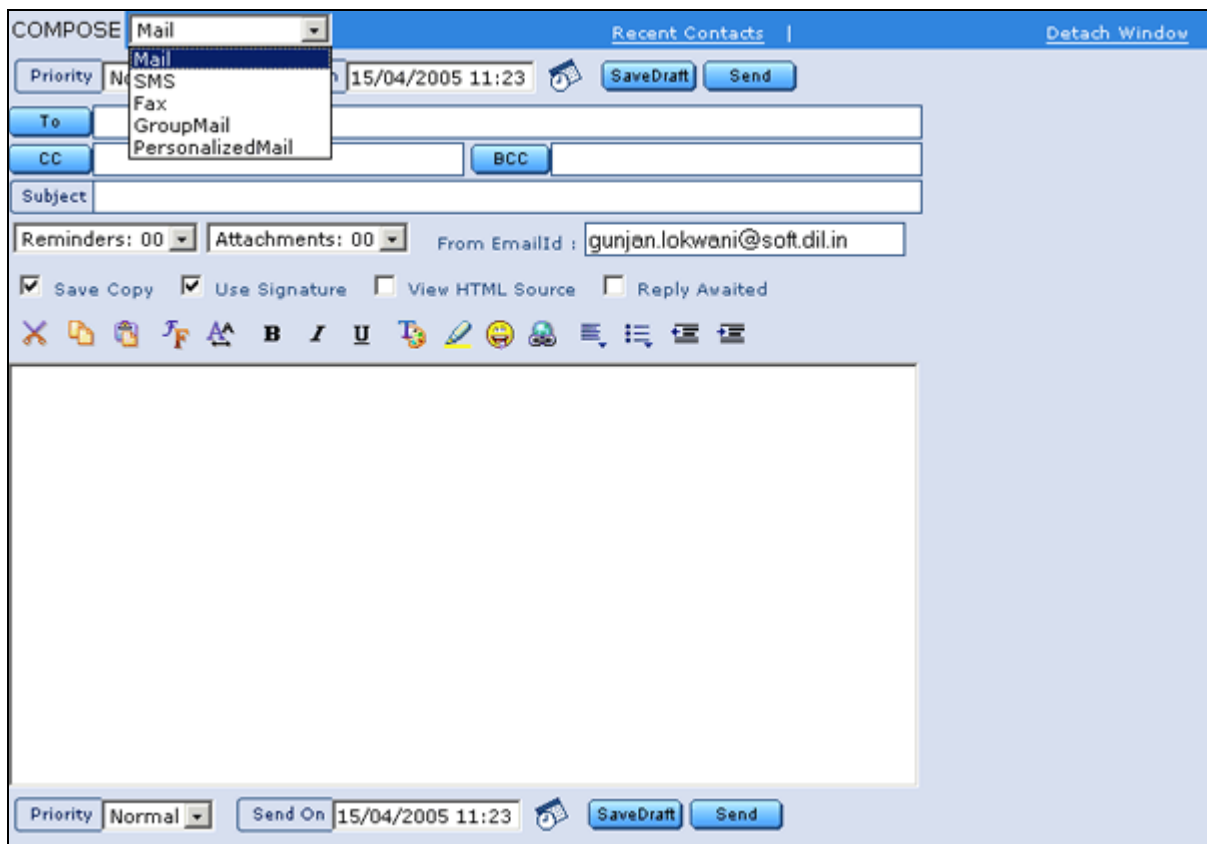

Fig 1.5 Compose Section

9. **COMPOSE:** The Compose page provides three different facilities:-

- Send Mail: It facilitates one to:
 - Send mails.
 - Design a desired format by using rich text/HTML with emotions.
 - Mail can be sent to multiple recipients, by inserting commas.
 - Composed mail can be sent to more than one person either by carbon copy "Cc" or by blind carbon copy "Bcc".
 - Quick address book for easy loading.
 - Add/Delete the attachments.
 - Save a copy of composed mail as draft,
 - Send the same mail on different dates by scheduling them up to 9 reminders. Etc.

Send Fax: The user can create separate password and user name for his fax account, Schedule the delivery of your fax, Send is use to deliver the fax.

Send SMS: User can send SMS to any mobile in India. It have following features:

- Messages up to 120 characters can be sent.
- Check box to send SMS as flash message.
- Schedule the delivery of SMS message.
